

Ibrahim Hassan

AI/ML Engineer

Cairo, Egypt | ih403020@gmail.com | +201099105419 | LinkedIn | GitHub

PROFESSIONAL SUMMARY

AI/ML Engineer specializing in scalable, production-grade **Machine Learning, LLM, and speech intelligence systems**. Experienced in developing and optimizing machine learning models, building data pipelines, implementing MLOps practices, and integrating AI capabilities into production systems. Strong foundation in **Python, TensorFlow, PyTorch, cloud infrastructure, Docker, Kubernetes, RESTful APIs, SQL, and relational database design**.

TECHNICAL SKILLS

- **Programming:** Python, SQL
- **Machine Learning:** Machine Learning, Data Preprocessing, Feature Engineering, Model Evaluation, Model Training, Performance Benchmarking, A/B Testing
- **Deep Learning:** TensorFlow, PyTorch
- **AI & LLM:** Large Language Models (LLMs), AI Applications, Agentic Systems, Speech Intelligence
- **MLOps:** MLflow, Kubeflow, SageMaker, Model Deployment, Model Monitoring, Version Control
- **Cloud:** AWS, GCP, Azure
- **DevOps & Infrastructure:** Docker, Kubernetes
- **Backend & APIs:** RESTful APIs
- **Databases:** SQL, Relational Database Design

PROFESSIONAL EXPERIENCE

Machine Learning Engineer | IBM — Cairo, Egypt

Aug 2024 – Jun 2026

- Designed, trained, and optimized machine learning models using **Python, TensorFlow, and PyTorch**.
- Developed and maintained **data pipelines** to ensure high-quality input data for model training and evaluation.
- Implemented **MLOps practices** to streamline model deployment, monitoring, and version control.
- Collaborated with **data scientists and software engineers** to integrate AI capabilities into production systems.
- Conducted **performance benchmarking and A/B testing** to evaluate model accuracy and business impact.

SELECTED PROJECTS

Movie Recommendation System

- Developed a **production-ready Django application** providing intelligent movie recommendations using advanced machine learning algorithms.
- Designed the system to scale from **thousands to millions of movies**.
- Implemented **TF-IDF vectorization, SVD dimensionality reduction, and content-based filtering** to generate relevant movie recommendations.
- Optimized the recommendation pipeline to deliver suggestions in **under 50 milliseconds**.

EDUCATION

Egyptian Russian University — Faculty of Artificial Intelligence

Bachelor of Science in Artificial Intelligence | Sep 2020 – Jun 2024

- Graduated with a strong foundation in **Artificial Intelligence, Machine Learning, and Data Science**.
